

# Adis Journals: Podcast Articles

For over 50 years Adis journals have been publishing high-quality content for global healthcare audiences. Our journals span all therapeutic areas with a focus on drugs, devices, diagnostics, and other interventions. The portfolio contains a number of high-impact journals that are leaders in their respective fields.

Adis offers podcast articles for today's audience of digital natives who prefer to consume content 'on the go' in audio formats. Vodcasts can also be considered if the authors prefer a video format.

Authors can discuss a topic of clinical relevance, such as a clinical trial, pivotal manuscript, conference data, or advances in a particular therapeutic area.

Podcasts are published as Commentary articles on SpringerLink. The audio file is embedded within the HTML and a transcript of the discussion is typeset and published as a 'regular' article for readers who prefer text-based media.

To maximise reach, podcasts are also hosted on Google Play, Apple Music, Spotify, and several other podcast-streaming services.

Adis podcasts have DOIs and are indexed on PubMed. They are citeable, permanent additions to the scientific literature – healthcare professionals can discover them easily in the places that they usually search for scientific literature.

Podcast articles are peer reviewed to the same standard as regular Adis journal articles. A detailed text outline or script of the discussion should be submitted for initial peer review. Once the script has been approved, authors can record the podcast. The final version is reviewed by Adis editors to ensure that the final version matches the approved script.

# Adis Podcast Articles

## Workflow

1	Presubmission Enquiry	Description of proposed topic and authors sent to Adis
2	Concept Approval	Editor checks topic for appropriateness and journal interest (2-3 days)
3	Outline	Detailed, bulleted outline of podcast sent to Adis
4	Peer Review	Outline peer reviewed by independent experts (2 weeks)
5	Podcast Creation	Authors record podcast in line with approved outline + create verbatim transcript
6	Peer Review	Podcast reviewed to check adherence to approved outline (1 week)
7	Publication	Published online (2-3 weeks from acceptance)
